**Annual Review
53rd Annual General Meeting
Lahore October 11, 2018**

Distinguished Members of Pakistan Sugar Mills Association,

I am pleased to present the Annual report of Pakistan Sugar Mills Association, here at the 53rd Annual General Meeting. The year under review remained very challenging.

All possible efforts were made to seek permission for the disposal of surplus sugar and release of export rebate. PSMA has remained actively engaged in fulfilling all attending responsibilities in addition to careful watch over and encouragement of the corporate social responsibility and promotion of competition.

2017-18 THE YEAR UNDER REVIEW

As per crop reports of provincial government's area under cultivation of sugarcane was 1.341 million hectares in 2017-18 with a yield of 83.3 million tons. Sugarcane utilization by mills remained limited to 65.6 million tons i.e., 78.80%. Sugar production as forecasted remained at 6.576 million tons. With a carryover stock inventory of 1.974 million tons from the preceding year total availability was 8.591 million tons of sugar including beet sugar of 40,922 tons. This quantity was almost surplus by 3.391 million tons after defraying domestic requirements of about 5.2 million tons. The sucrose contents in sugarcane marginally improved over last year as 10.02% against 9.87% of the previous year. The following two tables explain the position of area under cultivation of sugarcane & sugar production.

TABLE 1 FIVE-YEAR SUGARCANE STATISTICS OF AREA & YIELD

Year	Area Hectares	Production Tons	Yield Tons/Hectare
2013-2014	1,171,687	67,427,975	57.55
2014-2015	1,113,161	62,794,827	56.41
2015-2016	1,130,820	65,450,704	57.88
2016-2017	1,216,894	75,450,620	62.00
2017-2018	1,340,926	83,289,340	62.11

TABLE 2 FIVE-YEAR STATISTICS OF SUGAR PRODUCTION

Year	No. of Mills	Cane Crushing Tons	Sugar Production Tons	Recovery %
2013-2014	88	56,460,524	5,587,568	9.90
2014-2015	89	50,795,218	5,139,566	10.12
2015-2016	89	50,024,249	5,082,110	10.16
2016-2017	89	70,989,946	7,005,678	9.87
2017-2018	89	65,615,550	6,576,534	10.02

Over the last five years area increased from 1.17 million hectares to 1.340 million hectares i.e. up by 14.4% and production by 23.5. Due to higher sugarcane production in 2017-18 prices of sugar remained subdued due to surplus and there were inordinate delays in making payments to sugarcane farmers. The industry on an average was not able to break even.

SUGARCANE AND SUGAR PRICE POSITION 2017-18

Sugarcane price is fixed by the provincial governments irrespective of relevance with sugar price. There is no mechanism to notify price of sugar after evaluating the cost of producing sugar and to ensure that sale price of the industry does not fall below the level ascertained. This mechanism has been adopted in India for a fair and remunerative price to both the industry and the growers.

This dichotomy still persists and must be addressed by the new government. Our cost of production is almost 63/kg and selling price of sugar hovers around 50-51/kg and even less during the crushing season. The government adopts retail price as our selling price but the ex-mill price is lower by 2-3 /kg. There has been a colossal loss to the industry in the absence of determination of sugar price in the light of sugarcane support price which is meant to appease the farmers to secure rural vote bank by the government resultantly growers and industry suffer the most.

However PSMA continued its efforts to seek permission for the export of surplus sugar so that over-supply could be reduced to bring in a balance between demand and supply.

The retail price structure remained as under:

TABLE 3

Sugar Retail Market Average Price 2017-2018	
Month	Rs./KG
October	54.28
November	53.68
December	53.91
January	53.12

July	55.21
August	55.59
September	54.99
Average	53.57

Source: <http://www.pbs.gov.pk/content/price-statistics>

EXPORT

The export rebate was based on a cascading mechanism wherein floor of USD 376 PMT or lower was fixed at 10.70 / kg and in the event of achieving higher export price the rebate was to be reduced correspondingly and at a level of USD 499, there was no entitlement for rebate. In addition it was also decided that if there was any abnormal increase in the domestic price of sugar from the level of Sept 7, 2017 (Rs.54.87/kg) the committee constituted for this purpose was to recommend to the ECC for stoppage of further export.

Since the quantity allowed was not sufficient to off load the quantum of sugar PSMA requested for another SAB meeting in October 2017 and explained the gravity of situation and consequently SAB recommended 1.5 million tons for export which was allowed by ECC of the cabinet in November 2017 with similar conditions as already approved by the ECC in its decision dated 14th September, 2017 for timely payment of all the procured sugarcane and start of crushing season on full capacity. It was also decided by the ECC that after crushing season 2017-18 Federal government would not provide any freight support for export and the Provincial governments were directed to develop their own policies for such cause whenever required in future.

After the export of about two million tons of sugar there still remained a surplus and PSMA could not take up the matter with the caretaker government so a considerable time was lost before the new government could call a meeting of the SAB. Upon persuasion MOI called SAB meeting on 11th September to review the stock position of sugar.

Chairman PSMA gave a detailed presentation and apprised about the remaining surplus of about two million tons while the board after consulting all stakeholders and getting their input ascertained the stock at 1.962 million tons and thus recommended one million tons of sugar for export. The same was considered by ECC of the Cabinet in its meeting held on October 2, 2018 and approval was made for one million tons of sugar without any export rebate or freight subsidy. This will help to reduce the surplus

inventory however export will be difficult in view of glut in the international market which has impacted the price.

DOMESTIC OUTLOOK FOR 2018-19

Sugarcane production during the last five years has shown an upward trend as the competing crops remained less lucrative for farmers. However for the year 2018-19 we expect a slight shortfall in the sugarcane crop which can modestly affect the sugar production.

The preliminary estimates obtained from the provincial governments reflect a decline by 14.6% in Punjab and 19% in Sindh. With adequate rains the expected decrease is likely to be on the lower side with an overall reduction of about 10%. During 2017-18 out of 83 million tons production mills utilized 78.80% of sugarcane. In 2018-19 about 75 million tons of sugarcane is likely to be available for crushing and depending on mills utilization the estimated production will still be in excess of six million tons.

GLOBAL SUGAR SITUATION

The preceding year crop size created sugar surplus in the international market. In the year under review 2017-18 global production was forecasted at 179.4 million tons compared to 168.4 million tons of the corresponding period of last year showing an increase 6.6%. Similarly consumption went up from 171.5 million tons to 174.4 million tons an increase of 1.7% with a surplus of 5.03 million tons (Table-4).

The variation in the world production and consumption created an imbalance in the world sugar market leading to lower prices making sugar less attractive. Higher

production in Asian countries, in particular India and Thailand led to surplus in the global supply in 2017-18. The reduction in Brazil's production was not significant to impact the global supply and demand balance whereas Brazil has switched almost 53% of the sugarcane juice to produce ethanol thereby restricting sugar production to 47% of the sugarcane produced.

At the end, I would like to thank the Zonal Chairmen, Central and Zonal Executive Committees, all members of PSMA and the Secretaries and staff of PSMA for their continued cooperation and in time support during these recent multipronged challenges faced by the Association.

With profound regards and gratitude,

JAVED KAYANI

Chairman
